Relevant Work Experience

Cúram developer

CYSCC – Government of Ontario

Extended unit test frameworks and integrated SonarQube and Jazz Build Engine to provide continuous integration builds with code quality checks.

Design and implemented a configurable Excel sheet used for data migration.

Utilized unit testing frameworks, data migration logic and Excel sheets reduced training data creation from *240 hours to 4 hours*.

Technical Advisor

TD Canada Trust

Made internal TD developers *self-sufficient* by porting an external vendor's code base to work with the TD development tooling. Extended the code base to also support continuous integration testing with Pega backends.

Implemented an ELK solution that integrates Pega and WebSphere logging.

Developed a proof of concept to show AngularJS to work with JAX-RS to existing Pega and Tridion backends via JAX-WS on a mobile platform in a few short weeks.

Advisory IT Specialist

IBM Canada

For *over 13 years*, worked in various roles from development to operations for different projects and different industries using various technologies and methodologies providing solutions culminating from diverse experience.

Open source contributions

My portfolio site `javascript` `webpack` `nodejs` `material-design`

Batik Maven Plugin `java` `svg` `maven`
